

ABSTRACT OF THE DISCLOSURE

[0083] The present invention provides a chair having a removable outer cover. The chair has an air permeable bladder which houses compressible filler material. The compressible filler material allows the chair to be selectively compressed between various compressed states. A method for packaging the chair is provided which significantly reduces the weight and size of the chair. The method includes placing the chair in a vacuum chamber and suctioning air from the chair. The vacuum chamber may be partially open or closed during storage.
